

A/B Testing -
presented by “4 Shades of A/B”

How can different
versions be shown to
different groups of users?

- Frontend (Client side) → Cookies/Browser storage
- Backend(Server side) → User ID/Geolocation/IP
- Third party companies → Optimizely/Adobe Target

Which metric(s) should be
used to compare the
different versions?

- Click-Through Rate (CTR)
- Guardrail metric → PCR = Purchases: Page visitors
- Engagement Metrics → Time on page
- Retention Metrics → Repeat Purchase Rate
